

Overview

General Information

Since 1989 we've opened our doors to OEM makers of power supply units, magnetics and printed circuit board assemblies. For customers who need to access dedicated production facilities and expertise, we can provide unique services in strict quality and manufacturing management. This will certainly help to reduce your costing structure. You may choose from one of the nine production floors in our 17,000 sq. meter factory, nicely located in a resourceful area - only five minutes from Chang An exit of the Guangzhou Shenzhen Expressway. We also maintain a quality management system that aims to comply with customer specifications, manufacturing standards and society's requirements. All resources, including a workforce of 1,000, are oriented towards prevention of quality deficiencies. R&D engineers provide support with customized product design for demanding clientele worldwide. Our clients are among the leaders in their fields, producing medical quipment, telecommunication systems, local area networks and office automation systems, just to mention a few.
